

Profile: 8728

A cross-sectional diagram of a wood joint. On the left is a large rectangular block of wood. To its right, a dovetail pin is inserted into a slot. The pin has a wider rectangular head on the left and tapers to a point on the right. A dovetail wedge, which is wider at the point and tapers to a rectangular head on the left, is driven into the narrow tail of the pin from the right, locking the joint together.

"V" grooves are 3 1/2" apart starting at center of door.
End panes will vary in size.

Made in the USA

Additional door sizes available in Straight, Arch, and Cathedral Doors - Custom drawings per request
