To schedule a training session, contact Eli Strahm at eli@kochcabinet.com. Sessions will take approximately 40 minutes to complete and are usually scheduled on Tuesday or Thursday.

Once you have completed the training, Eli will set you up with a username and password to access the site.

Eli is available for continued support after training. If you need assistance with entering items, product code errors, or prices that do not match the price book, please reach out to him. He also offers remote support if you are having issues with the program.

If you need assistance with our 2020 Catalog, contact Anne Alderfer at anne@kochcabinet.com.

- Any price discrepancies, cabinet dimensions and descriptions that are inaccurate, or items displayed incorrectly
- Errors with a 2020 quote or difficulty importing to Cab Connect or Order Express.
- Access to the 2020 Catalog

Guide for Exporting from 2020 Version 10 and 11

The 2020 import tool allows the user to export the information from a design created in the 2020 program into Cabinet Connect or Order Express.

2. Choose the quote option in the pop-up.

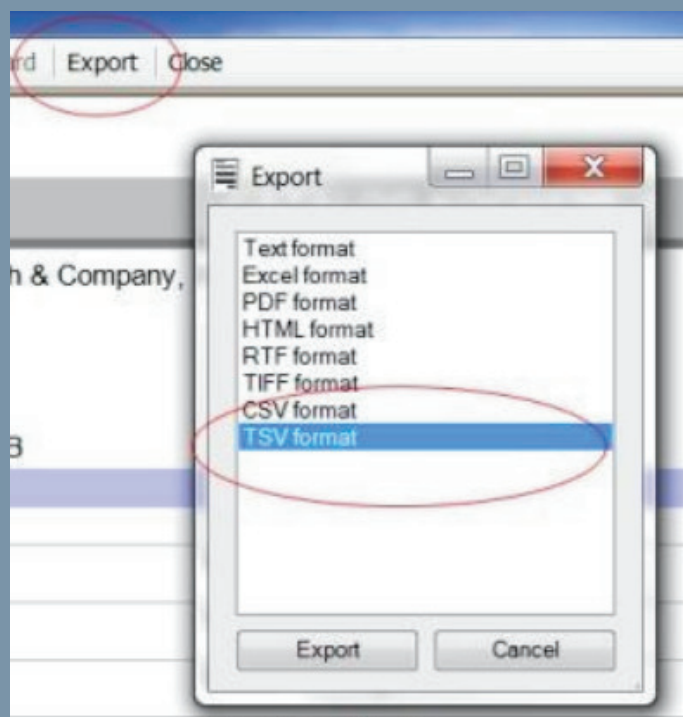

3. On the quote options screen set your nomenclature drop down to user codes and descriptions to import to Cabinet Connect. Use manufacturing codes and descriptions to import to Order Express.

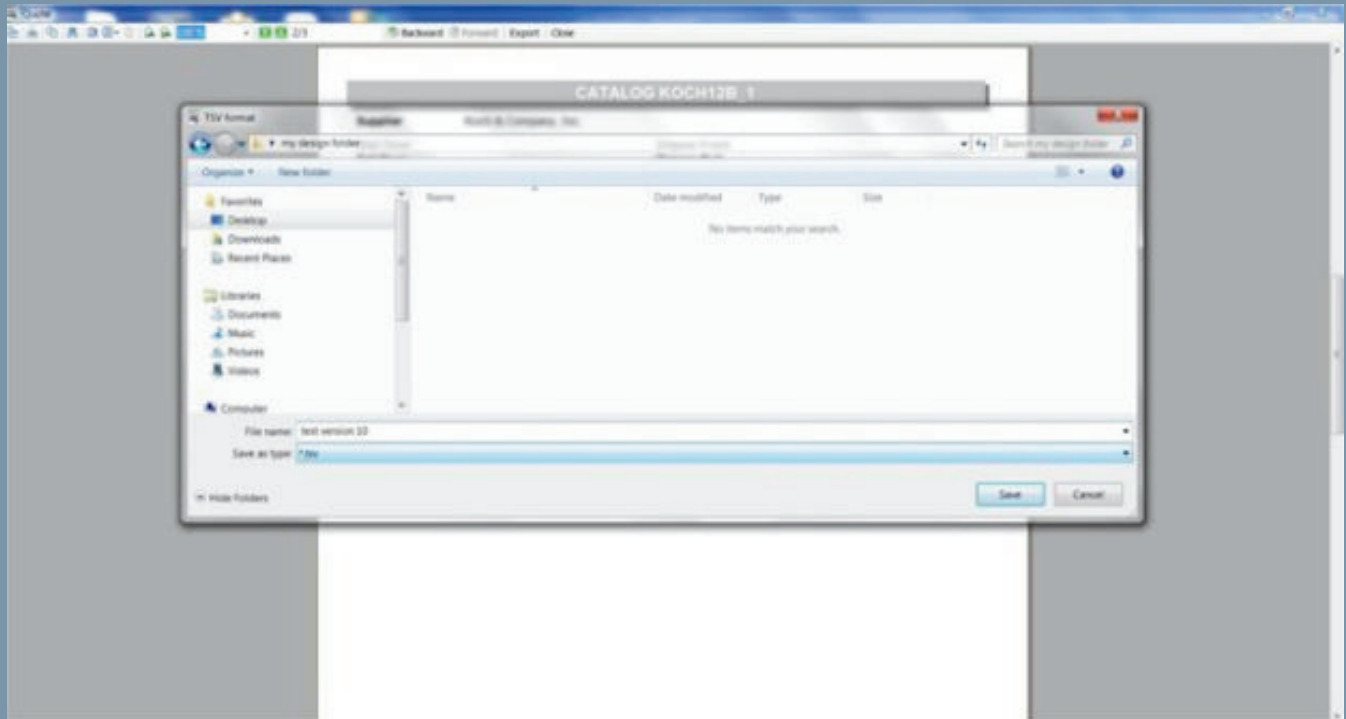

The screenshot shows the 'Quote Options' dialog box with the 'General' tab selected. The 'Report Title' is 'Quote'. The 'Sort Order' is 'Wall/Base/Tall'. The 'Nomenclature' dropdown is set to 'User codes & Descriptions' and is circled in red. The 'Logo path' is empty. The 'Project Note', 'Design Note', 'Page numbers', 'Print date', 'Logo', 'Category Totals', 'Style Info', 'List items', 'Item Price', 'Save paper', and 'Group Identical Items' checkboxes are all checked. The 'View' and 'Cancel' buttons at the bottom right are also circled in red.

Option	Value
Report Title:	Quote
Sort Order:	Wall/Base/Tall
Nomenclature:	User codes & Descriptions
Logo path:	
Project Note	☒
Design Note	☒
Page numbers:	☒
Print date:	☒
Logo:	☒
Category Totals:	☒
Style Info:	☒
List items	☒
Item Price:	☒
Save paper:	☐
Group Identical Items:	☐

4. Choose export at the top of the screen and select the TSV format from the options.

5. Save to your computer and then import into Cabinet Connect or Order Express.

Follow the process below if you are switching from one of the prior version catalogs to the current catalog

DO NOT PERFORM THE AUTOMATIC UPDATE OFFERED WHEN YOU PULL UP A DESIGN AFTER INSTALLING THE NEW CATALOGS.

Elect to perform the update manually.

1. Load your kitchen design to your 2020 program.
2. Perform a 'Save As' and put a 2 or VER2 behind the original file name (that way if something bad happens you can get back to the original design). You will perform all your actions on the copy, not the original design.
3. Go to Styles and Pricing and UNSET all settings under the Catalog Styles Tab and unset your price level tab settings. It is important to do this BEFORE you switch items.

When you FAIL TO UNSET your styles and pricing settings, which is a very important step, your design can create a GHOST or PHANTOM finish and/or specie charge or some misc. charge imbedded in the design. The Ghost is not accessible or removeable once embedded in the design. The item doesn't show up on the report, but the CHARGES DO, which makes the calculations inaccurate.

4. Now go to Edit/Switch items and perform an automatic switch. Some items will not switch if it is an item that has been discontinued or had a code change. Go to your design, or the items list, and DELETE those items or replace them from the NEW CATALOG.

5. Check your design to confirm the items were switched.

Check all items (Cabinets, attachments and accessories)

6. Reset your Styles and Pricing Settings and then run your Quote Report.

Deleting Old Catalogs

Do not delete your old catalogs UNTIL you have either switched all your designs to the new catalog OR you have completed the projects that you used the catalog to produce the designs. Old catalogs are not archived.

Additional Information

When you change a door style or wood species in your design you must first UNSET your options and put them back in. If you skip this step it could result in your quote having an exceptionally high price.

Contact anne@kochcabinet.com for 2020 issues and flaws in the catalog
