KOCH CABINETS, A DIVISION OF KOCH AND CO., INC, CABINET WARRANTY

LIMITED 5 YEAR WARRANTY

Koch & Co., Inc. warrants to the original consumer purchaser that the cabinet box, shelves, and drawer box will be free from defects in materials and workmanship, under normal use, for five years. This warranty is not transferable. No representative of Koch and Co., Inc. has the authority to modify this warranty.

Warranty Limitations

This limited 5 year warranty does not cover:

1. Products that are installed in cabinets that are not manufactured by Koch & Co., Inc. Example: Rev-A-Shelf items, Blum, etc.
2. Cabinetry installed outdoors.
3. Cabinets that have been improperly installed, cleaned, or maintained.
4. Cabinets not installed in the United States.
5. Defects caused by misuse, abuse, negligence, alterations, environmental conditions, improper installation, normal wear and tear, commercial use, or improper storage and handling.
6. Labor for replacement or removal of cabinets.
7. Classic and Imperial cabinets should not be mixed with Express cabinets in a project. Doing so will void any warranty on color issues.
8. Against expansion or contraction occurring as a result of humidity levels being too high or too low. We recommend 35 to 45% relative humidity levels in your home. This warranty will be void if cabinets are stored or installed in environments that do not have properly controlled humidity levels.
9. Damage claims on cabinets stored for longer than 90 days are subject to review by Koch management due to environmental exposure and additional handling issues. Some conditions could void this warranty.
10. Warp: Koch & Co., Inc. has an allowance of 3/16" on any door or drawer front under 24" wide x 45" tall. Any cabinet whose warpage exceeds 3/16" and can not be corrected by hinge adjustment will be replaced by Koch & Co., Inc. after it has been acclimated for 1 year. If doors are removed during installation pay close attention that they are reinstalled on the same cabinet.
11. Finish issues on unfinished cabinets.
12. Unfinished cabinets that are not finished within two weeks of delivery date.

Warranty Disclaimers

1. Wood characteristics that are inherently associated with a wood species. Each wood specie exhibits its own distinctive pattern and characteristics which adds to its natural beauty. Grain variations, mineral streaks, worm holes, and knots are not considered defects. There is no minimum or maximum amount of characteristics, and variations are not considered defects.
2. Color variations. This warranty does not cover the natural aging and darkening of the wood color, nor does it apply to the inherent growth characteristics of the wood. As with other natural materials, wood is affected by environmental factors such as natural and artificial lighting. Darkening or mellowing of the wood can be expected and is a natural process of wood.
3. From time to time, we will change design, specifications, and materials, as conditions require a no obligation to incorporate such changes in products we previously manufactured.

Warranty Performance

Koch & Co., Inc. may elect to repair or replace any Koch Cabinet product covered by our warranty. Should defects in material or workmanship exist during this warranty, Koch & Co., Inc. will elect at its discretion to either repair or replace the defective material or component, excluding labor costs. This warranty covers only parts and materials supplied by Koch & Co., Inc., and does not cover costs for removal or installation of counter tops, plumbing fixtures, appliances or related materials, or labor costs. Natural and environmental factors will affect cabinet products over time: therefore, Koch & Co., Inc. cannot be responsible for replacement products that may not exactly color-match installed product.

Some states do not allow exclusions or limitations of incidental or consequential damages, so the above limitations or exclusions may not apply. This warranty gives you specific legal rights, and you may also have other rights.

The Express Series is designed to be a commodity cabinet line. This entry level series of our cabinets may have slight imperfections that will be visible. This is an acceptable characteristic of this economical line and will not be a reason for replacement.

This warranty is in lieu of all other warranties expressed or implied.

EXPRESS SERIES CABINET SPECIFICATIONS

BASE CABINET

WALL CABINET

1. 3/4" HARDWOOD FACE FRAMES WITH GLUED AND POCKET SCREWED JOINTS.
2. 1/2" PARTICLE BOARD BACK WITH MAPLE PRINT INTERIOR, ELIMINATING THE NEED FOR HANG RAILS. WALL CABINETS OVER 36" WIDE WILL HAVE SHELF HOLES IN THE BACK.
3. 1/2" PARTICLE BOARD SIDES, TOPS AND BOTTOMS, WITH MAPLE PRINT INTERIOR AND EXTERIOR.

KOCH POLICY AND PROCEDURES

ORDERS: Please send orders via Cab Connect. Orders are assigned a work order number the same day they are received. Orders received after 2:00 pm will be logged in the next business day. We do not accept orders over the phone. 2:00 pm central time is the cut off time for order entry.

LEAD TIMES: Orders will be ready to ship 3 1/2 to 4 weeks after order is placed. Projects, or orders of 100 or more cabinets, will require a lead time up to 6 weeks.

SHIP LOG: A ship log will be e-mailed to you on a weekly basis. This log will give you an estimated ship date on cabinet orders that we have received.

SHIPPING: Any questions about shipping, truck schedules, requirements, etc., need to be directed to the shipping department. Contact them by phone at 866-739-5624 or email at shipping@kochcabinet.com

RUSH POLICY: Rush orders will have a \$50 per box charge. There is a limit of 3 cabinets per rush order. When you check the rush box on your cover sheet this charge will show up in your confirmation. Any order over three boxes WILL NOT be considered for our rush program. Rush orders will be ready to ship in approximately ten working days and will be shipped on the first available truck. Shipping date will depend on your truck schedule. If you decide to ship FED-EX or LTL those charges will apply. These charges can vary in price but will exceed \$125 depending on location of delivery. If a rush cabinet is needed, please contact Laurie, ext. 2630, who takes care of the production schedule. She will let you know how soon they can get the cabinet into production. No changes are allowed on orders after they have been confirmed. Work is started on the order as soon as it has been confirmed so that we can deliver it to you on time. Once the work has started it can not be stopped.

THIS EXPRESS SERIES IS DESIGNED TO BE A COMMODITY CABINET LINE.

THE RAISED PANEL DOOR IN THIS SERIES CONTAINS A VENEERED PANEL, NOT THE CLASSIC SERIES HARDWOOD PANEL.

WE ARE OFFERING FOUR WOOD OPTIONS: RED OAK, *BIRCH, PAINT GRADE - HD, & *RUSTIC BIRCH

TWELVE STAIN CHOICES: NATURAL, ALMOND, BRIARWOOD, BROWN SEPIA, DRIFTWOOD, PECAN, RUSSET, SIENNA, *STONE, *CHESTNUT, *FRONTIER AND *MOCHA

THIRTEEN PAINT CHOICES: *ACCESSIBLE BEIGE, *BLACK, *DUSK, *EVERGREEN FOG, *FOG, *FOXHALL GREEN, *FROST, *IVORY, *OYSTER, *SHOJI WHITE, *SMOKY BLUE, *TAUPE, AND *WHITE PAINTS ARE ONLY AVAILABLE ON PAINT GRADE - HD

*** SEE UPCHARGE INFORMATION ON PAGE 5**

**UNEXPOSED ENDS WILL BE MAPLE PRINT
OPTIONS FOR EXPOSED ENDS:**

- *1. PRINTED WOOD GRAINED ENDS THAT ARE CLOSELY MATCHING IN COLOR TO THE FACE FRAMES AND DOORS. PRINTED ENDS ARE NOT AVAILABLE IN THE COLONIAL SERIES. PRINTED ENDS ALSO NOT AVAILABLE IN THESE PAINT AND STAIN COLORS: ACCESSIBLE BEIGE, BLACK, CHESTNUT, DUSK, EVERGREEN FOG, FOG, FOXHALL GREEN, FROST, MOCHA, NATURAL, PECAN, RUSSET, SIENNA AND SMOKY BLUE.
- 2. UPGRADE: TO 1/4" WOOD VENEERED SKIN.

*** IF OPTION 1 (PRINTED ENDS) IS ORDERED, THE ENTIRE KITCHEN WILL BE PRINTED ENDS.**

ONCE YOUR ORDER IS PLACED, THERE CAN BE NO CHANGES. CONFIRMATION WILL BE SENT WITHIN 24 HOURS BUT THE ORDER WILL HAVE ALREADY BEEN SENT TO THE PRODUCTION PROCESS.

ABSOLUTELY NO CABINET MODIFICATIONS OR ADDITIONAL ACCESSORIES WILL BE ALLOWED.

CLASSIC AND IMPERIAL CABINET ORDERS SHOULD NOT BE MIXED IN WITH EXPRESS AND COLONIAL CABINETS IN ANY PROJECT. THIS WILL VOID ANY WARRANTY ON COLOR ISSUES.

WOOD DESCRIPTIONS

BIRCH

Birch is a smooth, even grained hardwood that is predominantly off-white with some red and brown variation giving it a calico appearance. Birch cabinets with a wiping stain will not be consistent in color. The ends of the stiles and the cross grain profile in the raised panel will be much darker than the rest of the door. In addition, the face frame, doors, and drawer fronts can vary in color. This is not considered a defect but desired by those wanting a "rustic" look.

PAINT GRADE-HD

Paint Grade-HD doors, 5-pc drawer fronts and slab drawer fronts are made from high density fiberboard. High density fiberboard provides a smooth finish and more stable joinery for paint. Paint Grade-HD mullion doors, overlay frames and accessories may contain paint grade solid wood, high density fiberboard or a combination of both.

RED OAK

Variations in color and graining of Oak wood are commonplace and Koch Cabinets will not be responsible for color or grain variations between a sample block and the complete order. Color can vary from white to light pink to red. The color and grain variations add to the beauty of Oak wood.

****RUSTIC BIRCH**

Rustic Birch is a smooth, even grained hardwood that is predominantly off-white with some red and brown variation giving it a calico appearance. Rustic Birch cabinets with a wiping stain will not be consistent in color. The ends of the stiles and the cross grain profile in the raised panel will be much darker than the rest of the door. In addition, the face frame, doors, and drawer fronts can be different colors. This is not considered a defect but desired by those wanting a "rustic" look.

****RUSTIC WOODS**

Rustic woods may contain natural sound defects and possess all inherent characteristics of the species. Minimal to no color or grain matching is done to preserve strong character. Some of the characteristics that may be represented are mineral streaks, pecks, burls, natural color variations, grain variations, and naturally occurring tight, open, and cracked knots. Open knots will be structurally "sound" and will not be seen through. The amount, size, and placement of natural characteristics will vary, and the consistency (or lack of) is not considered cause for replacement. Rustic woods may have less knots with more color variations and streaking. Paints are not recommended as they may reduce the appearance of the rustic characteristics. Dark stains may also reduce the appearance of the rustic character. We do not guarantee that each piece will have rustic characteristics. Due to the variations in plywood, some panels and parts may be clear.

STANDARD OVERLAY

Vertical reveals between doors or drawers of connecting cabinets will be $2 \frac{1}{2}"$. Horizontal reveals between stacked drawers, between drawers and doors and between stacked doors will be $\frac{3}{4}"$. Reveals at the top and bottom of walls, talls, bases, office, and vanities will be $1 \frac{1}{4}"$.

MODIFIED FULL OVERLAY

Vertical reveals between doors or drawers of connecting cabinets will be 1/2". Horizontal reveals between stacked drawers, between drawers and doors and between stacked doors will be 1/2". Reveals at the top walls and tails will be 1 1/4" and the bottom will be 1/4". Reveals at the top and bottom of bases, office, and vanities will be 1/4".

Wide stile or rail overlay will change reveal.

Blind base - door overlaps blind side 1/2".

Corner cabinet - 1" reveal on frame.

SPECIALTY FINISHES

PENCIL GLAZING:

Pencil Glazing is achieved by using a flow pen instrument to apply glaze to the detail in profiled areas. It is hand applied by our craftsmen, to give depth and highlight the moldings used.

The amount of highlights to the natural variation of the wood will depend on the door style and wood species.

Since glazing is hand applied, each door will have its own personality which adds a more unique, one of a kind addition to your home.

Pencil glazing is applied before the door is stained.

TRACE GLAZE:

Trace glaze is only available on painted cabinets and is applied to the painted door before the topcoat of varnish.

Trace glaze is hand applied, each door will have its own personality which adds a more unique, one of a kind addition to your home.

DYE STAINS:

Frontier, Chestnut, and Mocha are dye stains. Cabinets receive a coat of dye, a coat of stain, one coat of conversion varnish as a sealer, and one topcoat of conversion varnish.

WIPING STAINS:

Almond, Briarwood, Brown Sepia, Driftwood, Pecan, Russet, Sienna and *Stone are wiping stains. Cabinets receive a coat of stain, one coat of conversion varnish as a sealer, and one topcoat of conversion varnish.

*Stone stain is prone to color variations, resulting in light and dark sections in the cabinetry. Koch Cabinets uses hand wiping stains that bring out the natural characteristic of wood, which will vary depending on the species. This variation is a feature of Stone stain and will not be a reason for replacement.

PAINTS:

On wood products, movement is typical due to changes in the climate conditions. This will cause the hairline cracks at the stiles, rails, and joints that you will see in a painted finish. Panel shrinkage may also occur in the door panel of your cabinetry. Over time there may be a slight color change in this finish due to exposure to natural and artificial light. These items listed above are natural occurrences in the wood and will not be considered a defect or reason for replacement by Koch Cabinets.

When ordering painted cabinets there is a form on cab connect to fill out and submit with your order.

FINISHING PROCESS:

1. Doors and drawer fronts are sanded through a wide belt sander followed by an orbital sander.
2. They are hand sanded and inspected.
3. Stain is applied to both sides.
4. Doors and fronts have a seal coat applied and are oven cured one side at a time with a self-sealing conversion varnish.
5. They are hand seal sanded and brushed clean of sealer dust.
6. They have a top coat of conversion varnish applied and are oven cured one side at a time.

CABINET CARE

INTERIORS:

The interiors of the Koch Cabinets are surfaced with a Maple grained print that resists most stains, scuffs, and mars.

CLEANING:

Koch hardwood exteriors have a high quality finish on the wood that brings out its full beauty. We recommend cleaning the interior and exterior of your cabinets once a month with a clean damp sponge or cloth. If a spill occurs, it is important to clean up the spill and dry the surface right away. A spill left unattended will soak through the Maple print and cause damage. We do not recommend using paper towels because of their abrasiveness. To remove food residue or grease, use clean suds with a mild soap and water mixture. Do not use cleaners that have any abrasive additive, bleach, or ammonia. These cleaners will cause damage to your cabinet finish. Dishcloths used for other cleaning should never be used as they could contain remnants of harsh chemicals or grease. Following cleaning, wipe all excess moisture off the cabinet fronts and door backs.

CAUTION:

The most common form of damage done to cabinetry during normal maintenance is over scrubbing of the finishes, especially the edge profiles.

Excess moisture can damage any cabinet finish. Areas near the sink, dishwasher, range, oven, and baseboards are the most susceptible. Keep these areas dry.

Koch cabinets have a high quality varnish finish, and waxing is not necessary. Furniture polish may be used if waxing is preferred. Make sure to wipe off any excess polish to avoid build-up.

COLOR VARIANCE:

Colors of all products change as they age. Various wood species will react in different ways depending on their exposure to the sun as well as the environment they are located in. For instance Cherry darkens with age and becomes more red, while White will have a tendency to acquire a slightly more amber coloring. Colored paints and clears may become slightly duller. We use high quality coatings and woods to diminish these reactions and proper care and conditions in the home will also be beneficial. If replacement parts or additional cabinetry is needed more than a year after original purchase, a sample stain block from the original job should be sent in. It will NEVER be possible to perfectly match new cherry with old.

STAIN BLOCK AND SAMPLE DOOR EXPIRATION:

A sample block will not show the full range of color and grain variations. We recommend you view a door sample or a full cabinet display before making your final selection.

Koch Cabinets will not replace or refund cabinets because of variations in color or wood grain from a sample block.

All stain blocks and sample doors have a date on them. It is our recommendation that they be replaced when that date is more than 2 years old. Because of the fact that Cherry darkens at a much quicker rate, we recommend it be replaced after 6 months.

FURNITURE FINISH:

All finishes are glossier when freshly finished. The gloss level will tone down after approximately 6 months, depending on the environmental exposure.

CABINET DOOR BACKS:

Door backs will not be finished to the same level of artistic detail as the front. They will have the same blending color and durability as the front of the door. Please have door samples for your customers to view.

HARDWARE INSTRUCTIONS

DOOR ADJUSTMENT DIRECTIONS FOR BLUMOTION HINGE

Three-dimensional adjustment

Side adjustment

Rotate the front cam screw to increase or decrease door overlay (+/- 1/16").

Height adjustment

Loosen installation screws to adjust door position (+/- 1/8"), then retighten.

Depth adjustment

Rotate the rear cam screw to adjust door gap (+ 3/32", - 1/32").

BLUMOTION DEACTIVATION

Switch on the hinge cup

For small or light doors, the BLUMOTION can be deactivated on one of the hinges. COMPACT BLUMOTION comes in the activated position, marked with a "1". The deactivated position is marked with a "0".

Door must be closed once for the deactivation to be complete. To reactivate, move switch back to the original position "1".

COMPACT BLUMOTION ANGLE RESTRICTION CLIP - ASSEMBLY INSTRUCTIONS

Step 1 — Remove door

Loosen and remove installation screws.

Step 2 — Rotate hinge arm

Rotate hinge arm to closed position.

Step 3 — Insert angle restriction clip

Insert angle restriction clip (38C315B3) into base of hinge arm and secure.

Step 4 — Rotate hinge arm

Rotate hinge arm to open position.

Step 5 — Reattach door

Align door and reattach by inserting and tightening installation screws.

HARDWARE INSTRUCTIONS

TANDEM plus BLUMOTION		563H/563. installation instructions	
			
Height adjustment 1 Press up on adjustment tab 2 Push towards back of drawer 	Tilt adjustment Rotate the tilt adjustment lever on the rear of each runner to lift the back of the drawer and tilt the top of the drawer front forward 	Depth adjustment on runner TANDEM 563 runners feature elongated holes that allow ± 4.5 (3/16") depth adjustment 	
Maximum 3 (1/8") rise of drawer front (tool-free)		Maximum 5 (3/16") rise of drawer back (tool-free)	
NOTE: Height and tilt adjustments available with all combinations of locking devices and runners

MOISTURE INFORMATION

Effects of Moisture in Cabinets

Any solid wood or wood components will expand or contract with changing moisture and climate conditions. All wood is hygroscopic, meaning that when exposed to air, it will release or pick up moisture until it is in equilibrium with the humidity and temperature of the climate.

Humid Climates

Wood products located in humid climates are especially susceptible to expansion. As humidity levels increase, wood products will expand due to extra moisture in the air.

Dry Climates

In low humidity conditions, wood will release moisture and shrink or contract in size. In a dry climate, (or in a home that does not have a humidifier in the winter months) wood will shrink, exposing gaps at the joints where wood is trying to contract. This may result in the appearance of an unfinished line along the center panel. Koch Cabinets does not consider this a defect and will not replace doors due to this situation.

As wood expands or contracts, due to moisture content, it does not shrink or swell equally in all directions. Please note that just because wood is finished with a stain and topcoat, it is not immune to moisture. Cabinets will still take in moisture through contact with liquid or absorption from the air.

Seasonal temperatures and humidity changes (or situations such as higher than normal rain falls), can increase the calls dealers receive about the effects of moisture in cabinets. Teaching homeowners to monitor and control the levels of humidity can greatly reduce the occurrence of moisture related problems.

Measures that can be taken to Prevent Humidity Problems

Air conditioning, dehumidifiers, and humidifiers can help maintain satisfactory levels of moisture in a home. Using a hygrometer will make it easy to check the humidity level; they can be purchased at a hardware store. We recommend a range between 35% and 45% humidity.

*Density of wood affects how much, or how little, wood expands or contracts. Some door styles may be better suited for homes that are located in areas that are more susceptible to humidity issues. Vacation homes should maintain climate control when not in use. In an uncontrolled environment, wood is a dimensionally unstable material.

NOTE: Koch and Company's warranty is written with the expectation that cabinets will be stored and installed in a climate controlled environment. Warranty will be void if cabinets are stored or installed in buildings with extreme temperatures or humidity levels.

We want customers to enjoy their cabinets and working with them to avoid extreme levels of humidity will keep cabinets looking beautiful for many years.

Photo 1: Shows that the stile cracked due to panel movement in the door.

Photo 2: Shows that the panel had expanded in width about 3/16" due to high humidity in the room the cabinet was installed in.

Photo 3: Shows that the panel lip contracted about 3/16", to the correct size, after the humidity was regulated to the proper level.

Stile and Rail Doors

Not including Miter Doors

DOORS TALLER THAN 42" WILL BE A TWO-PANEL DOOR WITH A CENTER SPLITTER.

MITER DOORS

Miter doors taller than 46" are going to be two doors attached together with brackets on the back side.

This will function as one door.

Omega National

STAINLESS STEEL BLOWERS

Broan Ventilation Power Module for Omega Hoods

- Stainless steel
- 260 CFM/7 sones [high]- 2-speed rocker switch
- Bright LED lighting [more than 250 lumens]
- Quick-release dishwasher safe mesh aluminum filter

OMEGA-PM300

1845 EA

Broan Ventilation Power Module for Omega Hoods

- Stainless steel
- 400 CFM/6.5 sones [high] - 3-speed rotary switch
- Two bright LED lights [250 lumens]
- Quick-release dishwasher safe mesh aluminum filter
- Heat Sentry technology auto turns on when excessive heat is detected

OMEGA-PM400

3675 EA

Broan Ventilation Power Module for Omega Hoods

- Stainless steel
- Wifi enabled & Voice Control
- 600 CFM/9.5 sones [high] - 4-speed electronic soft touch controls
- 3-level LED lighting more than 300 lumens
- Baffle-style quick release filter - dishwasher safe
- Heat Sentry technology auto turns on when excessive heat is detected

OMEGA-PM600

7200 EA

Please note, we are not liable or responsible for determining the correct ventilation for each hood.

BASE DIMENSIONS

STANDARD BASE 9" THRU 39" W/ONE DOOR OR BUTT DOORS

Opening Width Calculation
Cabinet Width - 3.5" = X

STANDARD BASE 42" THRU 48" W/DRAWERS AND BUTT DOORS

Opening Width Calculation
Drawer opening is Cabinet Width - 5.25" / 2 = X
Butt Door opening is Cabinet Width - 3.5" = Y

BASE WITH FULL HEIGHT DOORS

Opening Width Calculation
Cabinet Width - 3.5" = X

THREE DRAWER BASE

Opening Width Calculation
Cabinet Width - 3.5" = X

TOE KICK IS RECESSED BACK 3"

BASE DIMENSIONS

FOUR DRAWER BASE
