PAINT GRADE – MAPLE

Movement is typical due to changes in the climate conditions on wood products. This may cause hairline cracks at the stiles, rails and joints that you will see in a painted finish. Shrinkage and expansion may also occur in the door panel of your cabinetry. Wood pieces expand and contract at different rates with changes in humidity. Over time, there may be a slight color change in this finish due to exposure to natural and artificial light.

Black and Charcoal Blue colors may amplify the natural flaws in the wood that may be hidden by lighter colors.

Listed above are natural occurrences in the wood and it is not considered a warranty issue with Koch Cabinets.

I have read the above information, and I acknowledge that Koch Cabinets does not consider the natural wood movement and characteristics of the painted finish I have chosen to be a warranty issue.
